

Results of the allocation process of capacities on 1st April 2009

Newsletter

02 March 2009

During February 2009, the storage capacities corresponding to rights for storage year 2009-2010 have been allocated according to the Storage Capacities Allocation Rules published by storengy on January 22nd, 2009. At the end of the process on February 27th, 2009, which attracted considerable interest, **a capacity of more than 105 TWh, ie. 99% of the concerned volume, has been allocated to 13 suppliers.**

The capacities which have not been allocated within the frame described above will be subscribed under a "first arrived-first served" mechanism in accordance with the allocation rules and in accordance with the conditions to be published on the Storengy website from the 3rd March 2009.

Moreover, in order to always improve the allocation process and its commercial offer, Storengy will organise a workshop with its clients and all the interested parties on 31st March 2009 at 2.00 pm.
